Asimakopoulos, D.N., 243

Balaras, C.A., 243
Banu, D., 77
Becker, R., 121, 133
Belcher, C., 115
Brau, J., 167
Buchanan, A.H., 205
Burch, J., 11
Butovsky, I.N., 231

Cantón, M.A., 219
Chow, W.K., 187
Claridge, D.E., 87, 193
Cortegoso, J.L., 219

Dascalaki, E., 243
Davis, B.E., 57
Day, B., 179
de Dear, R., 159
de Rosa, C., 219
Dewson, T., 179

Fairey, P., 97
Feldman, D., 77
Fishbaugher, M., 11
Fuchs, L., 27
Fung, W.Y., 187

Gasljevic, K., 45
Gu, L., 97
Guo, B., 115

Hawes, D.W., 77
Hitchcock, G., 151
Honey, B.G., 205
Hong, G., 179

Irving, A.D., 179

Jadud, M.A., 143
Judkoff, R., 11

Krarti, M., 1, 193
Kreider, J.F., 193

Li, Y., 27

Matrosov, Yu.A., 231
Matthys, E.F., 45
Melikov, A., 159
Modera, M., 65

Paciuk, M., 121, 133
Parker, D., 97

Ring, J.W., 159
Roberson, M.-R., 57
Robin, C., 167
Rock, B.A., 143
Roddis, W.M.K., 115
Roux, J.J., 167
Ruch, D.K., 87

Sandberg, M., 27
Santamouris, M., 243

Watson, R.K., 231

Subject Index of Volume 20

Air distribution systems
characterizing the performance of residential air distribution systems, 65
Airflow
numerical prediction of airflow and heat-radiation interaction in a room with displacement ventilation, 27
Air velocities
investigation of the subjective response to elevated air velocities: climate chamber experiments in Hong Kong, 187
Arkansas homes
using the "pressure pan" technique to prioritize duct sealing efforts: a study of 18 Arkansas homes, 57
Artificial intelligence tool
RetroLite: an artificial intelligence tool for lighting energy-efficiency upgrade, 115

Basements
steady-state heat transfer from partially insulated basements, 1
Behaviour
an integrated framework for energy use and behaviour in the domestic sector, 151
Building construction
energy and carbon dioxide implications of building construction, 205
Building materials
latent heat storage in building materials, 77
Buildings
case studies of energy consumption in residential buildings in Russia's middle belt area, 231

CAD system
integration of expert knowledge and simulation tools for the thermal design of buildings and energy systems, 167
Carbon dioxide
energy and carbon dioxide implications of building construction, 205
Commercial buildings
a development and comparison of NAC estimates for linear and change-point energy models for commercial buildings, 87
Convection
natural convection heat transfer coefficients from vertical and horizontal surfaces for building applications, 243

Displacement ventilation
numerical prediction of airflow and heat-radiation interaction in a room with displacement ventilation, 27
Drag-reducing additives
on saving pumping power in hydronic thermal distribution systems through the use of drag-reducing additives, 45
Duct leakage
simulation of the effects of duct leakage and heat transfer on residential space-cooling energy use, 97
Duct sealing
using the "pressure pan" technique to prioritize duct sealing efforts: a study of 18 Arkansas homes, 57

Dwellings
effects of heating patterns on overall thermal performance of dwellings, 133

Energy
energy and carbon dioxide implications of building construction, 205
Energy consumption
case studies of energy consumption in residential buildings in Russia's middle belt area, 231
Energy models
a development and comparison of NAC estimates for linear and change-point energy models for commercial buildings, 87
Energy use
an integrated framework for energy use and behaviour in the domestic sector, 151
Expert system
integration of expert knowledge and simulation tools for the thermal design of buildings and energy systems, 167

Framework
an integrated framework for energy use and behaviour in the domestic sector, 151
Frequency response
human thermal sensation: frequency response to sinusoidal stimuli at the surface of the skin, 159

Ground-coupling configurations
Schwarz-Christoffel transformation applied to steady-state ground-coupling problems, 193

Heat flux
comparison of time series response factor estimators, 179
Heating patterns
experimental validation of TARP for prediction of overall thermal performance under various heating patterns, 121
effects of heating patterns on overall thermal performance of dwellings, 133
Heat storage
latent heat storage in building materials, 77
Heat transfer
steady-state heat transfer from partially insulated basements, 1
simulation of the effects of duct leakage and heat transfer on residential space-cooling energy use, 97
Schwarz-Christoffel transformation applied to steady-state ground-coupling problems, 193
natural convection heat transfer coefficients from vertical and horizontal surfaces for building applications, 243
Human thermal sensation
human thermal sensation: frequency response to sinusoidal stimuli at the surface of the skin, 159
Hydronic thermal distribution systems
on saving pumping power in hydronic thermal distribution systems through the use of drag-reducing additives, 45

Indoor air quality
tobacco smoking policy and indoor air quality: a case study, 143
Integrated framework
an integrated framework for energy use and behaviour in the domestic sector, 151

Lighting-energy efficiency
RetroLite: an artificial intelligence tool for lighting energy-efficiency upgrade, 115

Mobile home
a utility bill study of mobile home weatherization savings, 11
Models
an integrated framework for energy use and behaviour in the domestic sector, 151

Normalized annual consumption index
a development and comparison of NAC estimates for linear and change-point energy models for commercial buildings, 87
Numerical prediction
numerical prediction of airflow and heat-radiation interaction in a room with displacement ventilation, 27

Pressure pan technique
using the "pressure pan" technique to prioritize duct sealing efforts: a study of 18 Arkansas homes, 57
Pumping power
on saving pumping power in hydronic thermal distribution systems through the use of drag-reducing additives, 45

Radiation
numerical prediction of airflow and heat-radiation interaction in a room with displacement ventilation, 27
Residential buildings
case studies of energy consumption in residential buildings in Russia's middle belt area, 231
Response factors
comparison of time series response factor estimators, 179

Schwarz-Christoffel transformation
Schwarz-Christoffel transformation applied to steady-state ground-coupling problems, 193
Skin
human thermal sensation: frequency response to sinusoidal stimuli at the surface of the skin, 159
Solar permeability
solar permeability of urban trees in cities of western Argentina, 219
Space-cooling energy use
simulation of the effects of duct leakage and heat transfer on residential space-cooling energy use, 97
Subjective response
investigation of the subjective response to elevated air velocities: climate chamber experiments in Hong Kong, 187
Surfaces
natural convection heat transfer coefficients from vertical and horizontal surfaces for building applications, 243

TARP (Thermal Analysis Research Program)
experimental validation of TARP for prediction of overall thermal performance under various heating patterns, 121
Thermal comfort
investigation of the subjective response to elevated air velocities: climate chamber experiments in Hong Kong, 187
Thermal design of building
integration of expert knowledge and simulation tools for the thermal design of buildings and energy systems, 167
Thermal performance
experimental validation of TARP for prediction of overall thermal performance under various heating patterns, 121
effects of heating patterns on overall thermal performance of dwellings, 133
Thermal sensation
human thermal sensation: frequency response to sinusoidal stimuli at the surface of the skin, 159
Tobacco smoke
tobacco smoking policy and indoor air quality: a case study, 143
Trees
solar permeability of urban trees in cities of western Argentina, 219

Urban environments
solar permeability of urban trees in cities of western Argentina, 219
Utility bill
a utility bill study of mobile home weatherization savings, 11

Ventilation
tobacco smoking policy and indoor air quality: a case study, 143

Weatherization savings
a utility bill study of mobile home weatherization savings, 11
Wood
energy and carbon dioxide implications of building construction, 205
